

PRO-SHIELD™

Whole Egg Specialized Proteins and Direct-Fed Microbial Powder For Bovine

What?

PRO-SHIELD™ is a proprietary, symbiotic blend of highly concentrated whole egg specialized proteins, yeast, prebiotics and probiotics in a water soluble powder.

When?

PRO-SHIELD™ is designed to be mixed into pasteurized milk, powdered milk replacer or electrolytes. **PRO-SHIELD™** should be included with each feeding for a minimum of 21 days or until weaned¹.

Why?

PRO-SHIELD™ is designed to introduce a high concentration of whole egg specialized proteins and lactic acid bacteria to calves during the first weeks of life. The “Bovine-Specific” whole egg proteins, yeast, prebiotics and probiotics used have been researched and selected to ensure maximum usability and benefits for the calf. The high concentration probiotics provide fast-acting microbial growth which creates high amounts of lactic acid creating unfavorable conditions for enteric bacteria¹.

Recommended Use¹

Normal 2 grams/day
Stressed 4 grams/day
High Stress 6 grams/day

¹Not intended to diagnose, treat, cure or prevent any disease.

Packaging

1 lb or 5 lb Resealable Poly Bag
10 lb or 25 lb Pail

Storage/Shelf Life

Keep closed and store in a cool, dry location. Expires 180 days from date of manufacture.

Guaranteed Analysis

Crude Protein (min) 37%
Crude Fat (min) 6%
Crude Fiber (max) 4%
Lactic Acid Bacteria (min) 4 billion CFU/Gram
And Yeast (Enterococcus faecium, Saccharomyces cerevisiae)
